PROFESSIONAL SUMMARY

Experienced in designing and implementing efficient back-end and full-stack solutions, enhancing system performance and user engagement. Strong skills in database management, API integration, and web development. Committed to improving software security and optimizing processes within diverse IT and software environments.

WORK EXPERIENCE

Back End Developer

Nov 2024 - Apr 2026

[PT. Bezhoe Infotek Indonesia](#)

- Contributed back-end architecture and system design for HR management systems used by large enterprise property groups. Covered key domains including:
 - Employee lifecycle management
 - Approval and workflow process
 - Payroll-related business logic
- Developed and implemented highly efficient back-end architecture that improved overall website performance by 50%.
- Successfully integrated third-party APIs and services to enhance the functionality of the website.
- Collaborated with cross-functional teams to troubleshoot and resolve complex back-end issues, reducing downtime by 75%.
- Designed and implemented database schema for a new feature, resulting in a seamless and scalable user experience.
- Improved website security by implementing encryption techniques and following best practices for data protection.
- ENTERPRISE HR-MANAGEMENT SYSTEMS

Full Stack Programmer

Jun 2022 - Jul 2024

[Dekate.id](#)

- Designed and maintained backend systems for multiple hospitals concurrently; handled:
 - Medical data integrity
 - Role-based access control
 - High-availability backend services
- Developed a full-stack e-commerce platform, resulting in a 30% increase in online sales and a 50% decrease in website loading time.
- Implemented automated testing processes, leading to a 75% reduction in software bugs and a 50% decrease in project delivery time.
- Designed and implemented a new user interface for a web application, resulting in a 20% increase in user engagement and a 40% decrease in user error rates.
- Led a team of developers in the successful launch of a mobile application, receiving 4.5 stars in the app store and reaching over 100,000 downloads within the first month.
- Optimized database queries and server configurations, resulting in a 70% decrease in website downtime.
- HEALTHCARE SYSTEMS

Full-stack Developer

May 2017 - Dec 2020

[PT Tadana Raya Dwarsa](#)

- Built back-end logic for multi-level incentive platforms focused on:
 - Hierarchical data modeling
 - Transaction consistency
 - Complex commission calculations
 - Developed and implemented a highly efficient e-commerce platform, resulting in a 20% increase in sales within the first quarter.
 - Successfully integrated third-party APIs into the company website, streamlining processes and reducing load time by 50%.
 - Led the migration of legacy systems to a cloud-based architecture, resulting in 40% cost savings and increased scalability.
 - Designed and launched a responsive mobile application, increasing customer engagement and retention by 30%.
 - Collaborated with cross-functional teams to create a customized CMS with advanced features, resulting in improved website management and user experience.
 - INCENTIVE-BASED & HIERARCHICAL SYSTEMS
-

EDUCATION

Computer Science in Software Technology

2014 - 2018

Universitas PGRI Madiun

GPA: 3.45

PROJECTS

Approval-Binary

Jan 2026 - Mar 2026

laravel

Approval Binary is a Laravel package for building approval workflow engines with binary/bitmask state tracking. It is not a CRUD approval scaffold and it does not ship a UI builder. The package focuses on reusable workflow orchestration: define approval blueprints in database records, resolve contributors at runtime, clone the selected blueprint into an execution event, and track approval progress with bitwise masks.

StockLab - HPP Calculator

May 2026 - May 2026

kotlin

StockLab is an offline inventory management app for small businesses. Track product purchase costs using COGS (Cost of Goods Sold) methodology with FIFO batch consumption.

URL: <https://play.google.com/store/apps/details?id=com.owl.minerva.stocklab>

coinbazooka

Jul 2023 - Aug 2023

laravel · react

Built a crypto listing platform for new tokens, presales, promoted coins, and trending crypto projects, including coin listing pages, market data display, chain-based filtering, promoted listings, and project discovery features.
